Legend

Laser engraving

A method used for permanent marking of objects made of metal, leather, wood, and plastic. The engraving so made is permanent, indesideuctible and looks very elegant.

Pad printing

Printing in several colors with the possibility of using colors from the Pantone palette. This technique is characterized by high quality and durability.

Full-color print

A technique that allows to make a very durable print in the full range of colors. It is characterized by a large number of details that give the effect of a "photo".

Hot stamping

An elegant marking method consisting in embossing a mark together with a gold or silver film. Available with the following packaging types: Giftbox, Casebox, Coverbox, Cardbox and even Easybox.

Illuminated logo

A unique and original marking effect consisting of an illumination of a special engraving from the back using LED diodes.

Doming - 3D sticker

A customised sticker is poured over with synthetic resin, thus forming a convex layer. It is a durable (protection against damage and discoloration) and attractive marking technology.

Embossing

Extremely durable and elegant method of making prints consisting in pressing a hot die to leather or leather-like materials.

Box with graphics

For products designated with this symbol it is possible to order a customised packaging.

Glossy / matt film

Print type boxes can be finished with high quality glossy or matt film. Standard type boxes are finished with matt film.

Data uploading

Our USB Flash Drives can be supplied with recorded content such as presentations, catalogues, promotional materials, etc.

Accessories

Products designated with this symbol have a range of accessories available such as: lanyards, snap hooks, chainlets, and cables.

OTG memory sticks

OTG flash drive has 2 USB connectors - a standard one for a computer and Type C or micro USB (depending on the model) to connect your smartphone or tablet. Note: a given mobile device has to support the OTG host technology.

Flashlight

Products with a LED flashlight built in.

Wireless

Wireless products with a 2.4 GHz transmitter.

Wireless charging

Charging process has become simpler than ever thanks to using induction for power transfer. Charging of phones and other mobile devices no longer requires using cables.
