Wooden	35		
"Eco" style	37		

Symbols used in the catalogue

The color markings presented in the catalog are not an exact representation, but only a certain approximation.

Size - dimensions of the gadget in millimetres

Materials - of which the casing is made.

Capacity - capacity of available batteries measured in mAh.

Casing color - in the descriptions, elements with an unchanging color may be omitted.

Materials: B - glossy, G - rubberized, Mat - matte, Met - metallic, P - polished, Sz - brushed, T - transparent.

Multicolor casing - with elements in different / two colors.

Pantone casing - available in all PANTONE colors.

Anodized casing - available colors depend on the model.

3.0 Flash drives - available in USB 3.0 technology.

Laser engraving - a method used for permanent marking of objects made of metal, leather, wood, and plastic. The engraving so made is permanent, indelible and looks very elegant.

3D laser engraving - laser engraving technique inside glass or acrylic. Allows you to engrave all points in the same plane (2D) or multi-plane (3D).

Pad printing - printing in several colors with the possibility of using colors from the Pantone palette. This technique is characterized by high quality and durability.

Full-color print - a technique that allows to make a very durable print in the full range of colors. It is characterized by a large number of details that give the effect of a „photo“.

Oxidation - a method used to print the logo on metal. The overprint is in chrome color and thickness.

Embossing - extremely durable and elegant method of making prints consisting in pressing a hot die to leather or leather-like materials.

Doming - 3D sticker - a customised sticker is poured over with synthetic resin, thus forming a convex layer. It is a durable (protection against damage and discoloration) and attractive marking technology.

LED backlit - to illuminate the logo we can use one selected LED color. The effect depends on the material that is illuminated.

PVC projects

We have extensive experience in manufacturing flash drives made of PVC, wood, leather, acrylic and other materials. We are able to meet all of our customers' expectations and make even the most sophisticated shapes.

1. DESIGN GUIDELINES

All we need is a schematic drawing or photo of the product, the logo in vectors and colors of Pantone.

2. VISUALIZATION IN 2D/3D

On the basis of guidelines from the customer, we prepare a 2D or 3D project and send it for approval. The work continues until the customer is fully satisfied.

3. SAMPLE ITEM

After preparing the visualization, we make one piece of flash memory and send photos for approval.

4. PRODUCTION & SHIPMENT

After approval of the photo sample, we start mass production. Our goal is to deliver the highest quality product to the customer as quickly as possible.
